

First name/Surname: Sebastiano Da Re
Telephone: +39 3484325801
E-mail: sebastiano.dare@phd.unipd.it
Nationality: Italy
Date of birth: 04/12/1996
Place of birth: Feltre (BL), Italy

Education:

- PhD student in Animal and Food Science (2023-)
- Master student in Land and environment science and technology (2018-2020)
- Bachelor student in Environment science and technology (2015-2018)

Research areas:

- Multifunctionality and Ecosystem Services of Livestock Systems in Mountain Areas

Brief description of Ph.D project:

“Multifunctionality and Ecosystem Services of Livestock Systems in Mountain Areas “

The aim of the research is to provide support for the multi-functionality of the Livestock Systems in Mountain Areas through the pattern of Ecosystem Services. Specifically, the research will focus on the identification of indicators for public benefits without market value and provided by various mountain livestock systems, especially located in the Alpine Region (Cultural Benefits, Biodiversity and Landscape Conservation, Climate Regulation and Nutrients Cycling).

For this purpose, sampling will consider representative farms of the various productive systems and socio-environmental contexts.

The main research outcome will be to provide instruments to evaluate the role of the Livestock Systems in Mountain Areas in the agroecological transition, to support the sectoral policies and coordinate rural development.

Supervisor:

Professor Maurizio Ramanzin

Co-supervisor:

Professor Enrico Sturaro
